

ADS i-Quad 120 4 Channel Mixer Amplifier

The i-Quad 120 is a fantastic 4 channel mixer amplifier. The i-Quad 120 is a fully featured, professional mixer amplifier with full on board zoning facilities and MP3 (SD/USB) player with FM tuner.

Each input can be easily designated to any of the four zone outputs using the front panel selector, with each zone featuring bass, treble and volume control so the audio can be tailored to each zone.

A built in MP3 / FM radio is incorporated on the front panel. On the rear are three combo mic/line inputs with selector and phantom power via XLR / 6.35mm jack. Two RCA line inputs allow CD / DVD / Streaming / DAB tuner etc. The RJ45 port accepts the dedicated ADS Signet 4iQ microphone. Up to 6 Signet 4iQ's can be cascaded from each amplifier with CAT5 cable connections.

A RS232 serial communication port is supplied for third party system communication.

A priority input can be used to override all other inputs.

A monitor output is provided. 70V, 100V and 4 Ω speaker outputs are supplied to give a plethora of applications.

Extensive protection functions from thermal, short-circuit, clip and Overload.
